

Dear Ayyappa,

How are you? The ground water charging work done at my home is giving very good benefit, earlier it used to take about 2+hrs for filling 2000 ltrs water tank from bore well now it takes about an hour to get it filled. The rain water filter system is helping us very much in case of rains, our sump gets filled and we don't buy water for 2-3days during that week
Thanks for your guidance and implementing the same at my home

Regards

Ramakrishnan (Ram)
